

Marbled Party Crackers

Tutorial

Some folding and cutting and your party crackers will be ready to fill!

Step 1 : folding

On both sides of the marbled paper, make a fold on the dotted lines, with marbled designs outside the fold (template inside), that makes 4 folds in total to create (see the photos below). Open up the folds.

Fold in the middle of the diamond shapes, with marbled designs inside the fold (template outside), on both sides of the sheet, that makes 2 other folds to do (see the photos below).

Step 2 : cutting

Keep closed these folds of the diamond shapes prior to cut them. Make sure you don't cut the space between each triangle, follow well the lines. Take off the paper pieces (save them if you want to turn them into confettis to put inside the cracker then).

Cut tabs and slots with a craft knife. If you don't have one, fold the tab and cut with scissors.

Step 3 : taking shape

Roll the paper to create a tube and insert the tabs into every slot (you can use tape if it doesn't hold on).

Step 4 : fill in'

Tie a knot on one side, keep it untangled and insert a snap cracker. Make the first knot tighter to keep the snap in place. Fill your crackers with your goodies. Close the other side with a knot and tuck the other side of the snap cracker inside. Here we go, let's the party happen!

Tutorial

Marbled Party Crackers

Those crackers are perfect to surprise your guests and embellish your table or any happy place! Filled of goodies and/or sweets, for sure the snap cracker put inside will provide amusement to the youngest ones.

This British tradition so popular in the USA too, has been spread all around the world now.

Snap crackers can be used for any events, not only for the holidays, to twist a little bit birthday parties, weddings, baby showers...etc. This is also a nice packaging that you can simply use as a gift wrap for your presents.

Enjoy and have fun!

Marbling is the art to create intricate designs with floating paints. Sitting between painting, printmaking and science, this craft sounds like magical. Jennifer, alias Wool Mood, loves to make the magic happen and create beautiful prints like those ones, specially selected to decorate your events and celebrations.
